Site AR — Reference Marker

Print at 100% / "Actual size" (no fit-to-page). Marker must measure exactly 18.0 cm wide.

18.0 cm — check with a ruler

How to use on site (underground utilities)

1. Stick the sheet on stiff board (cardboard / foam board) so it stays flat. Matte paper avoids glare.
2. Lay it flat on the ground centred on the reference point (e.g. manhole MH-02 cover).
3. Turn it so the N arrow points to plan north (use a compass app).
4. Open the app → Marker AR → "Reference card". Keep the card in view, 0.5–3 m away.
5. For tabletop use, any scale works: set the scale in the app (e.g. 1:100).

Tip: for viewing from standing height on site, print on A3 at 36 cm and enter 36 cm in the app.
